

# Report k druhému projektu do kurzu ITS/2019L

---

## Neimplementované testy z pôvodného plánu

---

Nasledovné scenáre neboli v druhej časti projektu implementované z dôvodu zlého návrhu, respektívne v poslednom prípade došlo k opakovanému scenáru, keďže z danej *feature* ho obsiahol predchádzajúci test:

```
Scenario Outline: Edit product's name
  Given administrator is in product catalog
  And product catalog is not empty
  When administrator click on Edit button to edit "<product>"
  And administrator changes "<product>"' name to "<new_name>"
  And administrator saves changes
  Then administrator is again in product catalog
  And name of "<product>" is now called "<new_name>"
```

Examples:

product	new_name
Semseng Galaxy Tab 10.1	Samsung Galaxy Tab 10.1
ajfon fajf	iPhone 5

```
Scenario Outline: Filter with zero results
```

```
  Given administrator is in product catalog
  When administrator sets status to "<status>"
  And all items have opposite status "<status2>"
  Then no products will be shown
```

Examples:

status	status2
Enabled	Disabled
Disabled	Enabled

```
Scenario Outline: Deleting an only item
```

```
  Given browser is at Shopping Cart's page
  And "<item>" is in Shopping Cart
```

```
And there is nothing else in Shopping Cart
When user deletes "<item>" from Shopping Cart
Then Shopping Cart is empty
```

Examples:

item	
iPod Touch	
Samsung SyncMaster 941BW	

Poznámka: Vo feature **Wishlist** bolo upravené poradie dvoch Given riadkov, keďže pre potreby testovania je logické, aby bol užívateľ najskôr prihlásený vo svojom účte a potom sa očakávalo, že sa nachádza na stránke konkrétneho produktu.

## Nájdené chyby

---

Nasledovný scenár objavil chybu v admin rozhraní:

```
Scenario: Google Analytics edit
Given administrator is at Analytics page
And Google Analytics is in the list
When administrator starts editing the Google Analytics extension
And administrator fills out the code
And administrator sets status of extension
And administrator saves changes
Then administrator is back at Analytics page
And Google Analytics extension is modified
```

Tento test overoval, či dochádza k správnej modifikácii Google Analytics pre e-shop. Kritický je riadok

```
Then administrator is back at Analytics page
```

Po uložení zmien totiž administrátor nie je presmerovaný späť na admin rozhranie, ale dostáva nasledovné hlásenie:

```
Notice: Undefined index: store_id in /var/www/html/admin/controller/analytics
/google_analytics.php on line 13****Warning: Cannot modify header information - headers
already sent by (output started at /var/www/html/admin/controller/startup/error.php:34) in
/var/www/html/system/library/response.php on line 12
```
